

Add an app to run automatically at startup in Windows 10

Windows 10

1. Select the **Start**  button and scroll to find the app you want to run at startup.
2. Right-click the app, select **More**, and then select **Open file location**. This opens the location where the shortcut to the app is saved. If there isn't an option for **Open file location**, it means the app can't run at startup.
3. With the file location open, press the **Windows logo key**  + **R**, type **shell:startup**, then select **OK**. This opens the **Startup** folder.
4. Copy and paste the shortcut to the app from the file location to the **Startup** folder.
