Unable to remove Mail Import or Website Import sessions via Plesk GUI

Ivan Kamnev (/hc/en-us/profiles/115438674253-Ivan-Kamnev)
Updated 9 months ago

Follow (/hc/en-us/articles/360007391054-Unable-to-remove-Mail-Import-or-Website-Import-sessions-via-Plesk-GUI/subscription.html)

Applicable to:

Plesk for Linux

Plesk for Windows

Symptoms

There is no possibility to remove sessions of the Mail Importing (https://docs.plesk.com/en-US/onyx/migration-guide/importing-mail.79397/) and Website Importing (https://docs.plesk.com/en-US/onyx/migration-guide/importing-websites.78361/) utilities via Plesk GUI.

Cause

The behavior is considered as a Plesk feature request with the ID #PMT-4498, which is planned to be addressed in future Plesk updates.

Resolution

As a workaround remove the sessions directories manually using one of the solutions below:

Solution for Linux servers

1. Log into the server via SSH (https://support.plesk.com/hc/en-us/articles/115000172834-How-to-connect-to-a-Plesk-server-via-SSH-with-available-server-s-credentials).
2. Run the command below to remove sessions directory for the required domain:

- For **Website Importing**:

```
# rm -rf /usr/local/psa/var/modules/site-import/sessions/site-migration-[domain-id]
```

- For **Mail Importing**:

```
# rm -rf /usr/local/psa/var/modules/site-import/sessions/mail-migration-[domain-id]
```

Note: to get [domain-id] execute the command below by replacing example.com with the name of the required domain:

```
# plesk db "select id as '[domain-id]' from domains where name='example.com'\G;" | grep -v row  
[domain-id]: 14
```

Solution for Windows servers

Do we have approximate time about when this issue is gonna get fixed?

We can't implement this feature until it's fully stable without need of any workarounds.

Hello AlpsHost,

Currently, there is no ETA available.

So does it mean that this needs to be done manually after each successful import?

Hi @b_p (/hc/en-us/profiles/9140489345-b-p)!

It's up to you whether to remove the sessions after the import is completed.
